OBJECTIVE

To apply my knowledge of mechanical engineering, including skills in machine-related problem solving, engineering drawing, and teamwork, to contribute effectively to projects and organizational goals. I aim to apply my practical experience in mechanical workshops, leadership abilities, and understanding of engineering systems to enhance productivity and deliver results.

EXPERIENCE

Interny 21/12/2024 - 8/1/2025
Artistic Millieners Karachi

- Gained insights into HSE practices at HEC department
- Understood boiler operations, accessories, and mountings
- Learned about ETP processes for converting wastewater into pure water
- Studied chiller systems, components, and cooling towers

EDUCATION

Intermediate 2021-23
Muslim Science Degree College Hyderabad
Engineering group

Mechanical Engineering 2023-2027
Mehran University of Engineering and Technology Jamshoro
Bachelor of Engineering

COURSES

Textile spinning (mechanical Maintenance)
Mehran University textile Engineering department
6 Months course (NAVTTTC program)
1/4/2021- 1/9/2021

PROJECTS

Table vice
Led the design and fabrication of a table vise in a mechanical workshop project. Managed materials and team co-ordination to produce a durable, functional tool

Open Ended Lab (Engineering Drawing):
Collaborated on machine part drawings in a hands-on lab project. Gained strong handmade drawing skills and practical knowledge of engineering drawing principles.

Blinking of LEDs Circuit:
Led the design and assembly of a functional LED blinking circuit in the Electronics subject. Managed team and material procurement while gaining hands-on experience in electronic systems.

CERTIFICATIONS

- Completed 10 sessions by D3 Digital Dream Dynamo:
 - Basics of AI, World of AI, Freelancing, Communication Skills
- Microsoft Office Certified
- Attended 1-day SolidWorks session at Mehran University
